The current designs proposed for 30 and 38 Clarkson street are smaller than their neighbors and smaller than what is permitted by the zoning envelope. By slightly increasing the building depth, it is possible to build traditional 3-unit triple deckers instead of 2-unit buildings on these sites, while respecting urban context. The NHI initiative would still deliver 9 units in total without construction at 29 Browning Ave.

Current versus Alternative	
Overall Savings	695,733
% Savings	17%
Per Unit	\$77,304
Total Units	9 (same)

By reducing the number of buildings from 5 to 4, significant cost savings could be realized through reduced sitework, overhead, and soft costs. **We estimate up to \$695,733 could be saved, or an average of \$77,304 per unit.**

Current Footprint at 30 & 38 Clarkson (26' x 47')

Proposed Alternative Footprint (23'x53')
