Starting this September, all SELDC approved work in the neighborhood will require a placard to be publicly posted on-site near the building permit. This will help us, help you identify approved and unapproved work.
Here's How...

**Step 1:** Apply for work and receive your certificate of approval. Print it out. It does not need to be printed in color.

**Step 2:** Post your approval on the front of the property, 1st level and clearly visible from the sidewalk, preferably near your building permit.

**Step 3:** Keep the placard posted and visible to the public for the duration of the project.
