

The best components for the best performance.

In keeping with traditional wood windows, Majesty windows withstand the elements and operate smoothly for a lifetime. Made in the USA, Majesty combines its impressive energy efficient glazing with a well-built, durable aluminum clad wood frame and sash – manufactured by folks who have been making windows for more than 50 years. That level of expertise is what sets Majesty apart; the perfect combination of state-of-the-art engineering, energy-saving value, and stylish elegance.

High Performance
Low-E coatings

Argon Gas

Endur® Stainless Steel
Spacer System

MAJESTY PREMIUM GLASS

Majesty double hung windows come standard with our Premium glass, which incorporates two panes of glass, high-performance double Low-E coatings, stainless steel spacer system, and argon gas. This glass system meets the most stringent ENERGY STAR® requirements which will significantly enhance the comfort in your home and help save you money on your home energy costs.

SOLID PONDEROSA PINE

The wood components of Majesty products resist rot, degradation, splitting, warping, and mildew through a controlled treatment process that immerses Ponderosa Pine in a special preservative similar to high quality deck sealant applications.

Strong and straight grained Ponderosa pine with exceptional beauty and strength

ALUMINUM CLADDING

The extruded 0.050" wall thickness of the frame provides strength, while the 0.024" wall thickness of the sash allows the cladding to be precision molded to protect the window sash and patio door panels from exterior environmental conditions. The result is eye catching, beautiful bevels and the sought-after aesthetics of custom wood windows.

Aluminum Clad Exterior shown in Forest Green (See options page for additional colors)

An electrostatic paint process adheres paint evenly onto all surfaces, ensuring an extremely durable finish that resists fading.

WEATHERSEALS

Concerned about installing wood windows in your climate? Don't be! Majesty seals are designed to perform over a wide range of temperatures and weather conditions. A lightweight polypropylene stiffener additive, which does not absorb water or collect mold, creates an airtight seal that does not distort over time. The seal ensures a consistent barrier from external conditions and allows for smooth window and patio door operation.

Foam-Tite compression bulb seals provide maximum protection from air and water

An average of 300 inches of custom designed Foam-Tite® compression bulb seals encase the full perimeter of the sash of Majesty windows – similar to seals you see on dishwashers or refrigerators.

PVC Jamb Liner available in both White or Almond

PVC JAMB LINER

The rigid non-compression Jamb Liner adds strength, stability and reduces air infiltration, while its special beveled design allows the sash to open and tilt easily.

Window #4

Window #3

A photograph showing a close-up view of a window frame. The frame is made of dark wood and is set into a concrete wall. The window opening is covered with a dark, textured material, possibly a tarp or a piece of fabric. A white label with the text "Window #4" is attached to the frame. The lighting is bright, suggesting an outdoor setting.
