

You deserve a home free of cockroaches, mice, and other pests. Contractors can help keep your home and family safe.

They will:

- Check drawers, closets, and cabinets
- Seal gaps or holes
- Leave sticky mouse traps and roach monitors
- Apply gel baits

Pests, like cockroaches and mice, can trigger asthma and other health problems, but some pesticides and sprays can also be harmful to the health of your family.

There is a safer way to get rid of pests. Contact the Boston Public Health Commission for more tips on how to keep the pests out.
