Are you experiencing symptoms of COVID-19?

STAY HOME & ISOLATE immediately, pending test results
GET TESTED (PCR and/or rapid antigen test)

PCR positive
You have COVID-19. Please continue to follow COVID-19 isolation guidance.

PCR negative
You do not have COVID-19 at this time. If you are still feeling ill, please continue to stay home and contact your healthcare provider for additional guidance and testing (including repeat COVID-19 testing and for flu).

Rapid antigen positive
You have COVID-19. Please continue to follow COVID-19 isolation guidance.

Rapid antigen negative
You may have early COVID-19. We recommend:
1) Repeat antigen test at 48 hours
OR
2) PCR test within 24-48 hours. Please continue to isolate as you await additional testing and contact your healthcare provider for additional guidance.

Rapid antigen test positive, PCR negative
You may have COVID-19 or may have had a false positive test. Please continue to follow COVID-19 isolation guidance and seek a healthcare evaluation.

Rapid antigen test negative, PCR positive
You do not have COVID-19 at this time. If you are still feeling ill, please continue to stay home and contact your healthcare provider for additional testing (including repeat COVID-19 testing and for flu).
COVID-19 Isolation Guidance: Ending isolation after a positive COVID-19 test

Are you still experiencing symptoms of COVID-19?

YES

Isolate for 10 days and return to work at Day 11, as long as fever-free without fever-reducing medication for 24 hours or unless directed by healthcare provider to extend isolation

NO

Are you fully vaccinated?

YES

Get tested with a rapid at-home antigen test at day 5 or after

POSITIVE

Serially retest between Days 6-9 to exit isolation earlier than Day 11. If testing is positive at Day 9, there is no need for additional testing beyond Day 10, you can stop isolating on Day 11. If you are concerned about ongoing symptoms, reach out to a healthcare provider for guidance.

NEGATIVE

Stop isolating on Day 6 (or day after negative test), must continue to wear a mask through Day 10.

NO

Get tested with a rapid at-home antigen test at day 7 or after

POSITIVE

Serially retest between day 8-9 to return to work earlier than Day 11. If testing positive at Day 9, there is no need for additional testing beyond Day 10, you can stop isolating on Day 11.

NEGATIVE

Stop isolating on Day 8 (or day after negative test), you must continue to wear a mask through Day 10.

Fully vaccinated is defined as

- 2 weeks after their second dose in a 2-dose primary series, such as the Pfizer or Moderna vaccines, or
- 2 weeks after a single-dose vaccine, such as Johnson & Johnson’s Janssen vaccine.
