**Tree Guards in Beacon Hill**

The installation of tree guards is beneficial because they help protect trees from vehicle impacts, dog urine and soil compaction.

**DESIGN**
- Choose one of the suggested tree guard styles or similar.
- Use wrought iron painted black.
- Style 1 is preferred for strength and lower height for easy access.
- Always include a bolted removable panel on the street side
- Raised brick tree pit surrounds are discouraged as they interrupt the flow of rain water into the tree pit and require extra maintenance.

**PERMITS**
- Submit drawings to Beacon Hill Architectural Commission for approval.
- Contact (617)635-3850 or BeaconHillAC@boston.gov.

**MAINTENANCE**
- Boston Parks and Recreation Department does not install or maintain tree guards.
- Beacon Hill neighbors are responsible for cost of installation and maintenance.

*If you need additional information, please contact the BHCA at www.bhcivic.org or (617)227-1922*
