Citywide Percent Variant Lineages

Average variant percentage across all BPHC sites weighted by population size | Table shows variant percentages for samples collected the week of 19-May-2024 (most recent available data); Variant results are reported weekly with a 3-week lag due to laboratory processing and analysis.

Sequencing Analysis Protocol Version: v1.15 (24-May-2024):

- XBB includes all XBB sublineages aside from those specifically reported
- "Other variants" contains all variants not explicitly quantified.

Version Changes: Added: KP.2, KP1.1
