

What is included in my Access Boston account?

One of the goals of the Access Boston service is to provide members of the City of Boston's workforce with a single username and password for most (or all) of their electronic resources.

Please note that Access Boston passwords must be changed every 365 days. If you do not change your password it gets reset after the one year mark. Use the *Forgot Password?* link at access.boston.gov to reset your password and get back into all the things listed below.

Here are the items connected to your Access Boston account based on where you work at the City.
