Health Commission

# Report Contents

## COVID-19 Summary

- Neighborhood Levels and Trends
- COVID-19 Citywide Overview and Trends
- BPHC Trend Overview by Neighborhood

## Detailed Results

- Neighborhood Levels and Data Table
- Results by Neighborhood
  - Allston/Brighton
  - Back Bay
  - Charlestown
  - Dorchester
  - East Boston
  - Hyde Park
  - Jamaica Plain
  - Mattapan
  - Roslindale/West Roxbury
  - Roxbury

## Variant Results

- Percent Variant Lineages (Citywide)

## Influenza & RSV

- Influenza Detections in Wastewater
- Influenza Trends in Wastewater by Neighborhood
- RSV Detections in Wastewater
- RSV Trends in Wastewater by Neighborhood

# A Note About These Reports

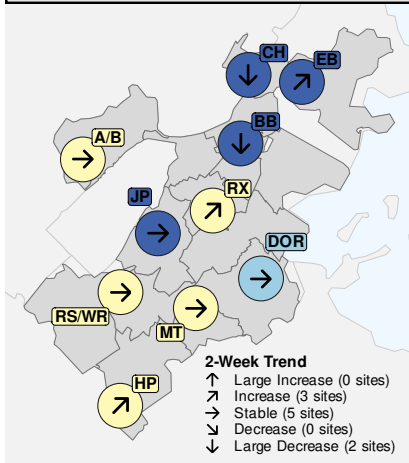

The laboratory that tests Boston's wastewater changed on August 1, 2024. Because of differences in the methods used at the old laboratory and the new one, data may not be comparable before and after the change. The change is marked with a vertical red line on figures in this report. BPHC cautions against drawing conclusions by comparing data to the left and right of this line. BPHC closely monitors the data and the methods used to communicate these results, and presents the best understanding of the data in these reports. A report with more information about the lab change will be made available on the BPHC Wastewater Monitoring web page.

# Neighborhood Levels and Trends

## COVID-19 Wastewater Levels & Trends (12-Feb-2025)

COVID-19 Level (# sites)

| Level     | 4 sites | 1 sites | 5 sites |  |  |
|-----------|---------|---------|---------|--|--|
| Very Low  |         |         |         |  |  |
| Low       |         |         |         |  |  |
| Moderate  |         |         |         |  |  |
| High      |         |         |         |  |  |
| Very High |         |         |         |  |  |

## BOSTON CITYWIDE COVID-19 LEVEL & TRENDS

### COVID-19 LEVEL

**Low**

609 copies/mL  
samples through 12-Feb-2025

### 2-WEEK TRENDS

Stable  
-93 copies/mL (-13%)

## NEIGHBORHOOD SITES COVID-19 LEVEL & TRENDS

| Level    | Neighborhood/Site               | Trend            |
|----------|---------------------------------|------------------|
| Moderate | Roxbury (RX)                    | ↗ Increase       |
|          | Mattapan (MT)                   | → Stable         |
|          | Hyde Park (HP)                  | ↗ Increase       |
|          | Roslindale/West Roxbury (RS/WR) | → Stable         |
|          | Allston/Brighton (A/B)          | → Stable         |
| Low      | Dorchester (DOR)                | → Stable         |
| Very Low | East Boston (EB)                | ↗ Increase       |
|          | Charlestown (CH)                | ↘ Large Decrease |
|          | Jamaica Plain (JP)              | → Stable         |
|          | Back Bay (BB)                   | ↘ Large Decrease |

# COVID-19 Citywide Overview and Trends

CITYWIDE  
AVERAGE

**609**

RNA copies/mL

RANGE ACROSS 11  
NEIGHBORHOOD SITES

**250-1,030**

RNA copies/mL

Data through: **12-Feb-2025**

## 2-WEEK TRENDS

*Boston*  
**Stable**

**-13%**  
over the past 14 days

*MWRA North*  
**Decreasing**

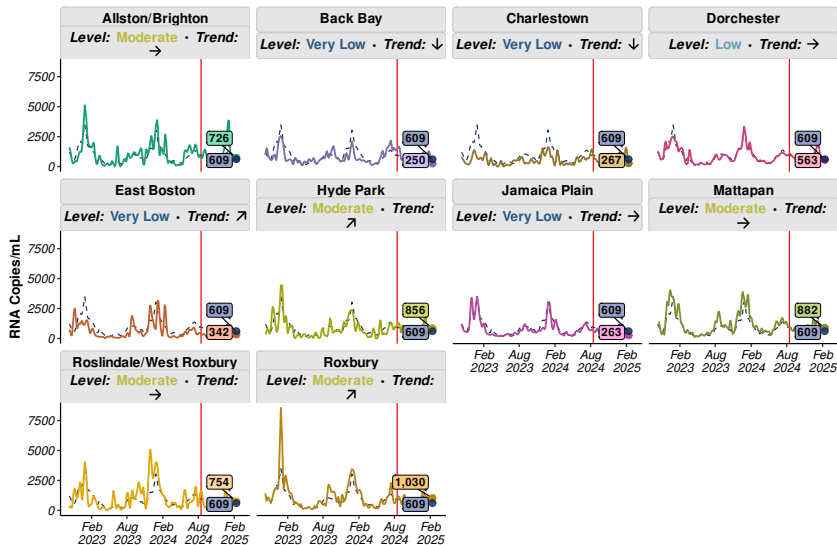

**-38%**  
over the past 14 days

*MWRA South*  
**Decreasing**

**-45%**  
over the past 14 days

Updated: 18-Feb-2025 | Samples through: 12-Feb-2025 (BPHC); 13-Feb-2025 (MWRA) | MWRA Data: <https://www.mwra.com/biobot/biobotdata.htm>

# BPHC Trend Overview by Neighborhood

For each neighborhood, colored line and textbox shows the smoothed trend and most recent value in that neighborhood;

The dotted blue line and dark blue text box in each panel shows the trend and most recent value across **all Boston sites** weighted by population.

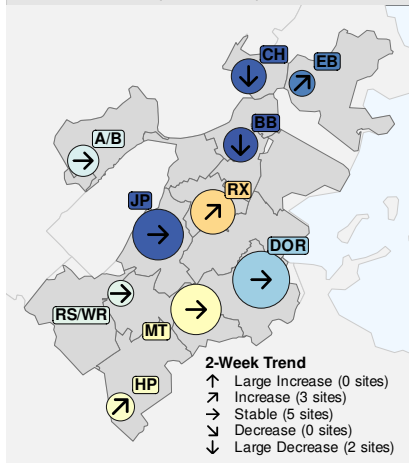

The vertical red line marks the date of August 1, 2024, when the laboratory that tests Boston's wastewater changed.

To see details and interpretation of these results for an individual neighborhood see [Results by Neighborhood](#).

COVID-19 Wastewater Levels & Trends  
(12-Feb-2025)

| NH     | COVID-19 Wastewater Levels |          | 2-Week Trends  |                      |             |
|--------|----------------------------|----------|----------------|----------------------|-------------|
|        | Conc.<br>(copies/mL)       | Level    | Trend          | Diff.<br>(copies/mL) | %<br>Change |
| BOSTON | 609                        | Low      | Stable         | -93                  | -13%        |
| RX     | 1,030                      | Moderate | Increase       | +190                 | +23%        |
| MT     | 882                        | Moderate | Stable         | -125                 | -12%        |
| HP     | 856                        | Moderate | Increase       | +419                 | +96%        |
| RS/WR  | 754                        | Moderate | Stable         | -88                  | -10%        |
| A/B    | 726                        | Moderate | Stable         | -94                  | -12%        |
| DOR    | 563                        | Low      | Stable         | -132                 | -19%        |
| EB     | 342                        | Very Low | Increase       | +151                 | +79%        |
| CH     | 267                        | Very Low | Large Decrease | -1,310               | -83%        |
| JP     | 263                        | Very Low | Stable         | -45                  | -15%        |
| BB     | 250                        | Very Low | Large Decrease | -814                 | -76%        |

**Concentration Levels:** Very High: >1,400 copies/mL; High: 1,050-1,400 copies/mL; Moderate: 700-1,050 copies/mL; Low: 350-700 copies/mL; Very Low: ≤350 copies/mL

**2-Week Trend Categories:** Large Increase: >+500 copies/mL; Increase: +150 to +500 copies/mL; Stable: -150 to +150 copies/mL; Decrease: -500 to -150 copies/mL; Large Decrease: ≤-500 copies/mL

# Results by Neighborhood

- Allston-Brighton (A/B)
- Back Bay (BB)
- Charlestown (CH)
- Dorchester (DOR)
- East Boston (EB)
- Hyde Park (HP)
- Jamaica Plain (JP)
- Mattapan (MT)
- Roslindale/West Roxbury (RS/WR)
- Roxbury (RX)
- South Boston (SB)

# Allston/Brighton

Level: **Moderate**

- Average value in **A/B** over the past week: **726** copies/mL.
- This value is **moderate** compared to past values and **similar** than the citywide average (**609** copies/mL).

Trend: → **Stable**

- Over the past two weeks, values in **A/B** are **stable**.
- Change compared to two weeks ago: **-94** copies/mL (**-12%**).

Updated: 18-Feb-2025 | Samples through: 12-Feb-2025 (A/B);

See [recommended actions and resources](#) based on levels and trends in this neighborhood.

# Back Bay

Level: **Very Low**

- Average value in **BB** over the past week: **250** copies/mL.
- This value is **very low** compared to past values and **lower** than the citywide average (**609** copies/mL).

Trend: **↓ Large Decrease**

- Over the past two weeks, values in **BB** are **decreasing**.
- Change compared to two weeks ago: **-814** copies/mL (**-76%**).

Updated: 18-Feb-2025 | Samples through: 12-Feb-2025 (BB);

See [recommended actions and resources](#) based on levels and trends in this neighborhood.

# Charlestown

Level: **Very Low**

- Average value in **CH** over the past week: **267** copies/mL.
- This value is **very low** compared to past values and **similar** than the citywide average (**609** copies/mL).

Trend: **↓ Large Decrease**

- Over the past two weeks, values in **CH** are **decreasing**.
- Change compared to two weeks ago: **-1,310** copies/mL (**-83%**).

Updated: 18-Feb-2025 | Samples through: 12-Feb-2025 (CH);

See [recommended actions and resources](#) based on levels and trends in this neighborhood.

# Dorchester

Level: **Low**

- Average value in **DOR** over the past week: **563** copies/mL.
- This value is **low** compared to past values and **similar** than the citywide average (**609** copies/mL).

Trend: → **Stable**

- Over the past two weeks, values in **DOR** are **stable**.
- Change compared to two weeks ago: **-132** copies/mL (**-19%**).

Updated: 18-Feb-2025 | Samples through: 12-Feb-2025 (DOR);

See [recommended actions and resources](#) based on levels and trends in this neighborhood.

# East Boston

Level: **Very Low**

- Average value in **EB** over the past week: **342** copies/mL.
- This value is **very low** compared to past values and **similar** than the citywide average (**609** copies/mL).

Trend: **↗ Increase**

- Over the past two weeks, values in **EB** are **increasing**.
- Change compared to two weeks ago: **+151** copies/mL (**+79%**).

See [recommended actions and resources](#) based on levels and trends in this neighborhood.

# Hyde Park

Level: **Moderate**

- Average value in **HP** over the past week: **856** copies/mL.
- This value is **moderate** compared to past values and **similar** than the citywide average (**609** copies/mL).

Trend: **↗ Increase**

- Over the past two weeks, values in **HP** are **increasing**.
- Change compared to two weeks ago: **+419** copies/mL (**+96%**).

Updated: 18-Feb-2025 | Samples through: 12-Feb-2025 (HP);

See [recommended actions and resources](#) based on levels and trends in this neighborhood.

# Jamaica Plain

Level: **Very Low**

- Average value in **JP** over the past week: **263** copies/mL.
- This value is **very low** compared to past values and **similar** than the citywide average (**609** copies/mL).

Trend: **→ Stable**

- Over the past two weeks, values in **JP** are **stable**.
- Change compared to two weeks ago: **-45** copies/mL (**-15%**).

Updated: 18-Feb-2025 | Samples through: 12-Feb-2025 (JP);

See [recommended actions and resources](#) based on levels and trends in this neighborhood.

# Mattapan

Level: **Moderate**

- Average value in **MT** over the past week: **882** copies/mL.
- This value is **moderate** compared to past values and **similar** than the citywide average (**609** copies/mL).

Trend: → **Stable**

- Over the past two weeks, values in **MT** are **stable**.
- Change compared to two weeks ago: **-125** copies/mL (**-12%**).

Updated: 18-Feb-2025 | Samples through: 12-Feb-2025 (MT);

See [recommended actions and resources](#) based on levels and trends in this neighborhood.

# Roslindale/West Roxbury

Level: **Moderate**

- Average value in **RS/WR** over the past week: **754** copies/mL.
- This value is **moderate** compared to past values and **similar** than the citywide average (**609** copies/mL).

Trend: → **Stable**

- Over the past two weeks, values in **RS/WR** are **stable**.
- Change compared to two weeks ago: **-88** copies/mL (-10%).

Updated: 18-Feb-2025 | Samples through: 12-Feb-2025 (RS/WR);

See [recommended actions and resources](#) based on levels and trends in this neighborhood.

Level: **Moderate**

- Average value in **RX** over the past week: **1,030** copies/mL.
- This value is **moderate** compared to past values and **higher** than the citywide average (**609** copies/mL).

Trend: **↗ Increase**

- Over the past two weeks, values in **RX** are **increasing**.
- Change compared to two weeks ago: **+190** copies/mL (**+23%**).

Updated: 18-Feb-2025 | Samples through: 12-Feb-2025 (RX);

See [recommended actions and resources](#) based on levels and trends in this neighborhood.

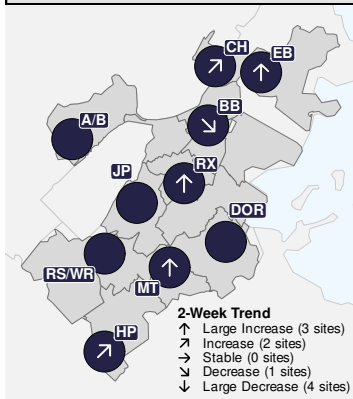

# Percent Variant Lineages (Citywide)

# Influenza Detections in Wastewater

**Influenza Wastewater Detections & Trends**  
(12-Feb-2025)

# Samples Positive for Flu (Past 3 Samples)

| 0 sites    | 0 sites    | 0 sites    | 10 sites   | 0 sites              |
|------------|------------|------------|------------|----------------------|
| 0 positive | 1 positive | 2 positive | 3 positive | No Samples Collected |

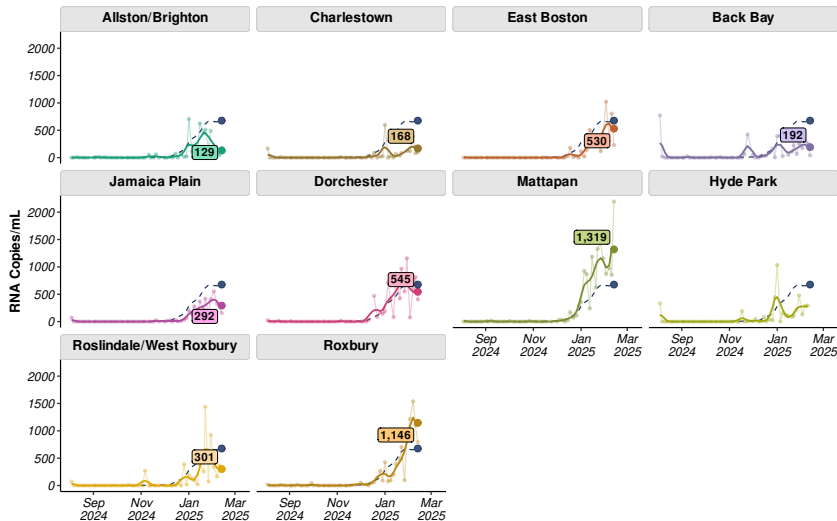

This map depicts the number of times influenza virus was detected in wastewater at the 3 most-recent samples (approximately the past week) at each of the neighborhood sampling locations.

# Influenza Trends in Wastewater by Neighborhood

Influenza Trends in Wastewater

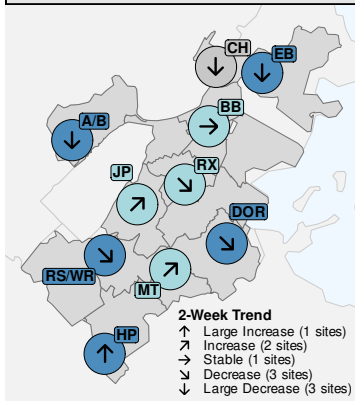

For each neighborhood, colored line and textbox shows the smoothed trend and most recent value in that neighborhood;

The dotted blue line in each panel shows the trend and most recent value across **all Boston sites** weighted by population.

# RSV Detections in Wastewater

## RSV Wastewater Detections & Trends (12-Feb-2025)

# Samples Positive for RSV (Past 3 Samples)

| 1 sites    | 4 sites    | 5 sites    | 0 sites    | 0 sites              |
|------------|------------|------------|------------|----------------------|
| 0 positive | 1 positive | 2 positive | 3 positive | No Samples Collected |

RSV = Respiratory Syncytial Virus

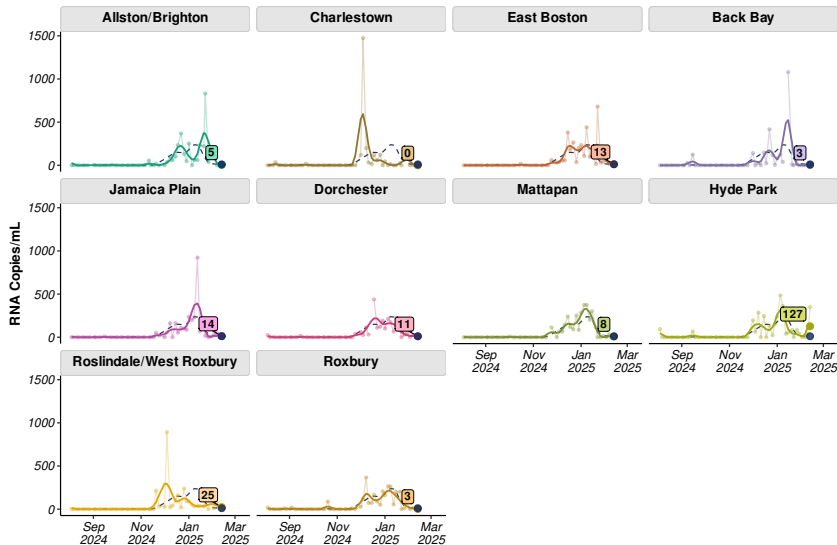

This map depicts the number of times RSV was detected in wastewater at the 3 most-recent samples (approximately the past week) at each of the neighborhood sampling locations.

Samples Positive for RSV (past 3 samples)

| 0 positive | 1 positive | 2 positive | 3 positive | No Samples Collected |
|------------|------------|------------|------------|----------------------|
|------------|------------|------------|------------|----------------------|

# RSV Trends in Wastewater by Neighborhood

For each neighborhood, colored line and textbox shows the smoothed trend and most recent value in that neighborhood;

The dotted blue line in each panel shows the trend and most recent value across **all Boston sites** weighted by population.

# COVID-19 Wastewater Level and Trend Category Definitions

## Concentration Levels

| Concentration Level | Concentration Value (Copies/mL) |
|---------------------|---------------------------------|
| Very High           | >1,400                          |
| High                | 1,050-1,400                     |
| Moderate            | 700-1,050                       |
| Low                 | 350-700                         |
| Very Low            | ≤350                            |

## 2-Week Trend Categories

|   | Trend Category | Trend Value (Copies/mL) |
|---|----------------|-------------------------|
| ↑ | Large Increase | >+500                   |
| ↗ | Increase       | +150 to +500            |
| → | Stable         | -150 to +150            |
| ↘ | Decrease       | -500 to -150            |
| ↓ | Large Decrease | ≤-500                   |

# Level: **Very High**

Wastewater viral levels in your neighborhood indicate **very high risk** of COVID-19 infection.

Based on this level, BPHC urgently recommends the following practices to prevent COVID-19 in your community:

- Wear a [high-quality mask or respirator](#)
- If you are at [high risk of getting very sick](#), consider limiting non-essential indoor activities in public where you could be exposed.
- If you have close contact with someone at [high risk of getting very sick](#), consider self-testing to detect infection before contact, and consider wearing a high-quality mask when indoors with them
- Stay up-to-date on [vaccinations](#).
- Recognize the [symptoms](#) of COVID-19 and seek testing and possible treatment if you get sick
- Stay home when sick and avoid contact with others who are sick
- Improve [indoor airflow and ventilation](#)
- Wash your hands often and cover coughs and sneezes
- Follow CDC recommendations for [preventing spread](#) if you have COVID-19

## RESOURCES

- Find a [vaccination clinic](#) in your neighborhood
- Pick up a [free at-home test kit](#) in your neighborhood
- Find [treatment](#) for COVID-19 including [free telehealth](#) and [in home treatment](#)
- Call or visit the [Mayor's Health Line](#)
- Learn more about COVID-19 and find additional resources: [COVID-19 in Boston](#)

# Level: High

Wastewater viral levels in your neighborhood indicate **high risk** of COVID-19 infection.

Based on this level, BPHC strongly recommends the following practices to prevent COVID-19 in your community:

- Wear a [high-quality mask or respirator](#)
- If you have close contact with someone at [high risk of getting very sick](#), consider self-testing to detect infection before contact, and consider wearing a high-quality mask when indoors with them
- Stay up-to-date on [vaccinations](#).
- Recognize the [symptoms](#) of COVID-19 and seek testing and possible treatment if you get sick
- Stay home when sick and avoid contact with others who are sick
- Improve [indoor airflow and ventilation](#)
- Wash your hands often and cover coughs and sneezes
- Follow CDC recommendations for [preventing spread](#) if you have COVID-19

## RESOURCES

- Find a [vaccination clinic](#) in your neighborhood
- Pick up a [free at-home test kit](#) in your neighborhood
- Find [treatment](#) for COVID-19 including [free telehealth](#) and [in home treatment](#)
- Call or visit the [Mayor's Health Line](#)
- Learn more about COVID-19 and find additional resources: [COVID-19 in Boston](#)

## Level: **Moderate**

Wastewater viral levels in your neighborhood indicate **moderate risk** of COVID-19 infection.

Based on this level, BPHC recommends the following practices to prevent COVID-19 in your community:

- If you are at [high risk of getting very sick](#), wear a [high-quality mask or respirator](#) in public indoor spaces
- If you have close contact with someone at [high risk of getting very sick](#), consider self-testing to detect infection before contact, and consider wearing a high-quality mask when indoors with them
- Stay up-to-date on [vaccinations](#).
- Recognize the [symptoms](#) of COVID-19 and seek testing and possible treatment if you get sick
- Stay home when sick and avoid contact with others who are sick
- Improve [indoor airflow and ventilation](#)
- Wash your hands often and cover coughs and sneezes
- Follow CDC recommendations for [preventing spread](#) if you have COVID-19

## RESOURCES

- Find a [vaccination clinic](#) in your neighborhood
- Pick up a [free at-home test kit](#) in your neighborhood
- Find [treatment](#) for COVID-19 including [free telehealth](#) and [in home treatment](#)
- Call or visit the [Mayor's Health Line](#)
- Learn more about COVID-19 and find additional resources: [COVID-19 in Boston](#)

Wastewater viral levels in your neighborhood indicate **low risk** of COVID-19 infection.

Based on this level, BPHC recommends the following practices to prevent COVID-19 in your community:

- **Continue to monitor wastewater levels and trends**
- Stay up-to-date on [vaccinations](#).
- Recognize the [symptoms](#) of COVID-19 and seek testing and possible treatment if you get sick
- Stay home when sick and avoid contact with others who are sick
- Improve [indoor airflow and ventilation](#)
- Wash your hands often and cover coughs and sneezes
- Follow CDC recommendations for [preventing spread](#) if you have COVID-19

## RESOURCES

- Find a [vaccination clinic](#) in your neighborhood
- Pick up a [free at-home test kit](#) in your neighborhood
- Find [treatment](#) for COVID-19 including [free telehealth](#) and [in home treatment](#)
- Call or visit the [Mayor's Health Line](#)
- Learn more about COVID-19 and find additional resources: [COVID-19 in Boston](#)

# Level: **Very Low**

Wastewater viral levels in your neighborhood indicate **very low risk** of COVID-19 infection.

Based on this level, BPHC recommends the following practices to prevent COVID-19 in your community:

- **Continue to monitor wastewater levels and trends**
- Stay up-to-date on [vaccinations](#).
- Recognize the [symptoms](#) of COVID-19 and seek testing and possible treatment if you get sick
- Stay home when sick and avoid contact with others who are sick
- Improve [indoor airflow and ventilation](#)
- Wash your hands often and cover coughs and sneezes
- Follow CDC recommendations for [preventing spread](#) if you have COVID-19

## RESOURCES

- Find a [vaccination clinic](#) in your neighborhood
- Pick up a [free at-home test kit](#) in your neighborhood
- Find [treatment](#) for COVID-19 including [free telehealth](#) and [in home treatment](#)
- Call or visit the [Mayor's Health Line](#)
- Learn more about COVID-19 and find additional resources: [COVID-19 in Boston](#)
