Dear Caterin,

Thank you for walking me through your building again. The camera system is functional but could use a refresh for higher resolution and coverage in the back of the building. The following is a breakdown of the ideas we discussed. The installed price of each item is in ( ). Thank you for the opportunity to be of service.

## CAMERAS SYSTEM UPGRADE:

1. Change the existing recorder to a 8 channel Digital Watchdog A1+, 5 Mpixel recorder with HDMI 1080P screen. (\$2,440)
2. Add Two 5 Mpixel cameras to the rear wall with views as shown. (\$620/ea) (Black/grey in case color for brick)
3. Replace the existing 4 cameras with 5 Mpixel cameras \$460/ea (white in case color.)
4. Re aim the new Garden Camera for best view.

**Total Camera System Upgrade: \$5,620**

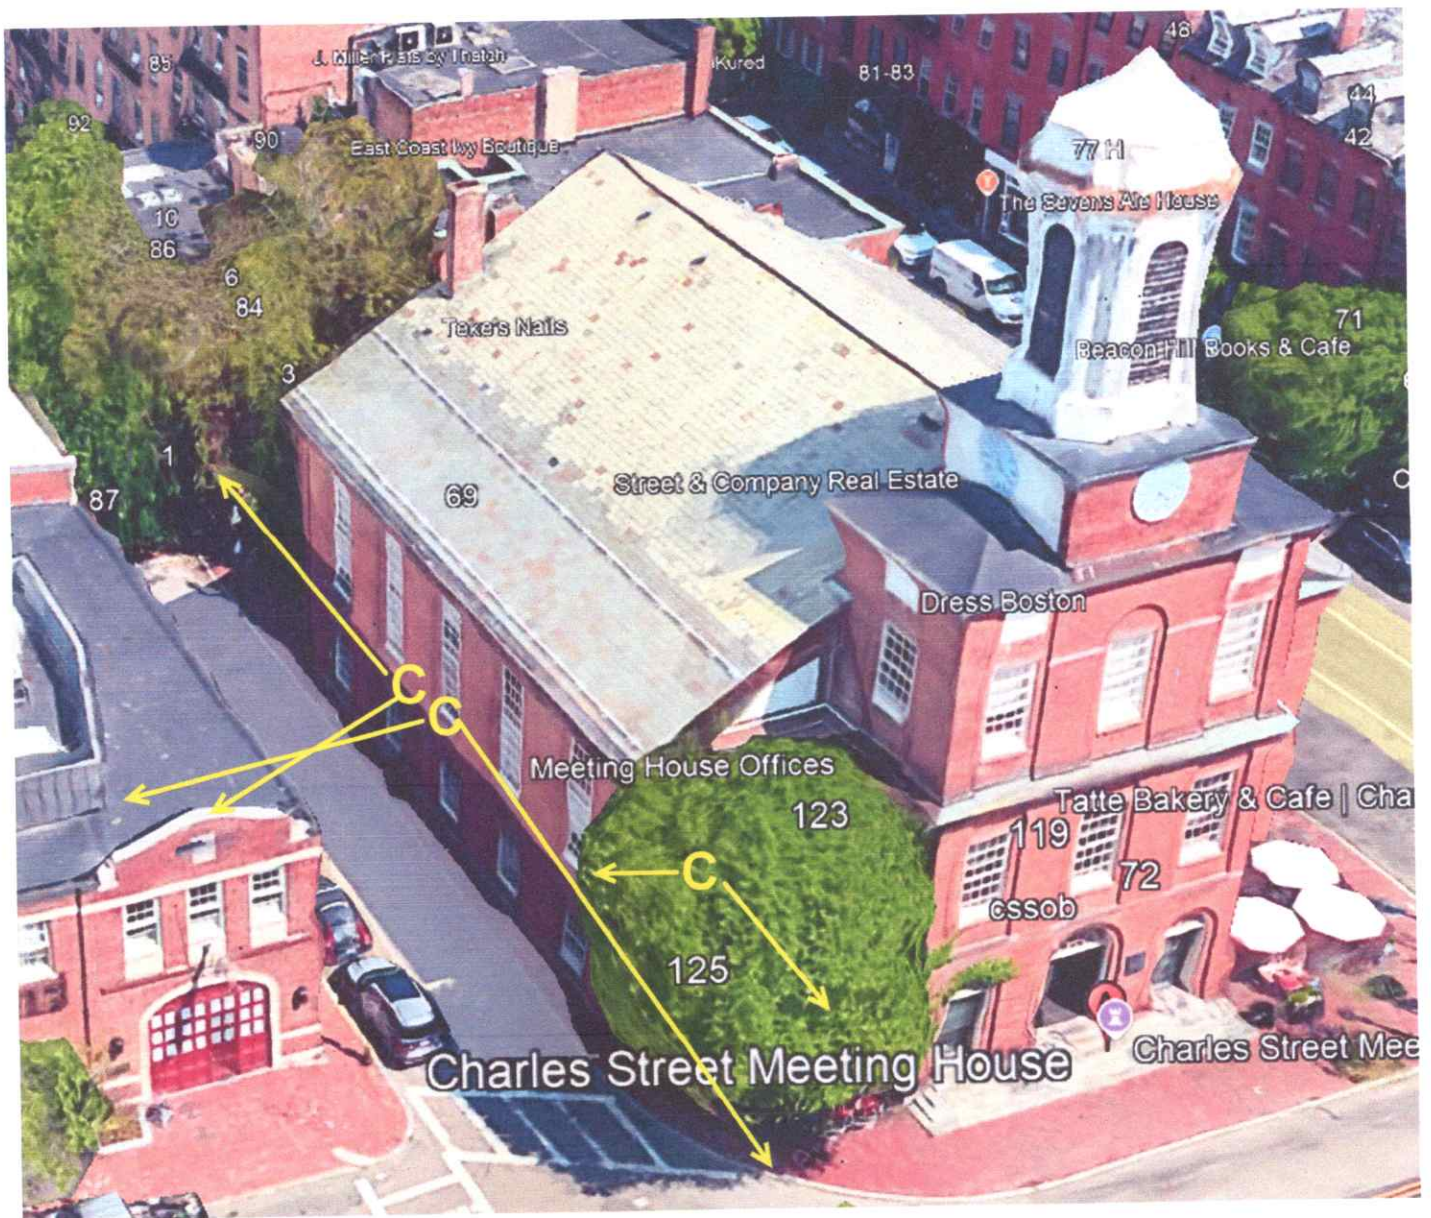

## THOUGHTS:

This new configuration will have 6 cameras. The recorder quoted can have 8. If you think you may want more cameras in the near future, you might select a 16 ch recorder. This would allow room for expansion but also perform at a faster frame rate with more storage space. The upgrade is \$480.

All systems by Shufro Security Co. Inc. are warranted for one year, parts and labor. Thank you for your consideration.

Yours truly,  
Richard Shufro

Full coverage of the rear of the building,  
and improved view at the Garden door

Inside cameras will show greatly improved resolution and color.
