

Quality Goal 2 : To increase the viral suppression rate among People Living with HIV/AIDS in the Boston EMA from 90% to 92% by FY 2025.
 Objective 1 : Use the newly updated Quality of Life outcomes data to better understand barriers to viral suppression and identify improvement opportunities and service needs.

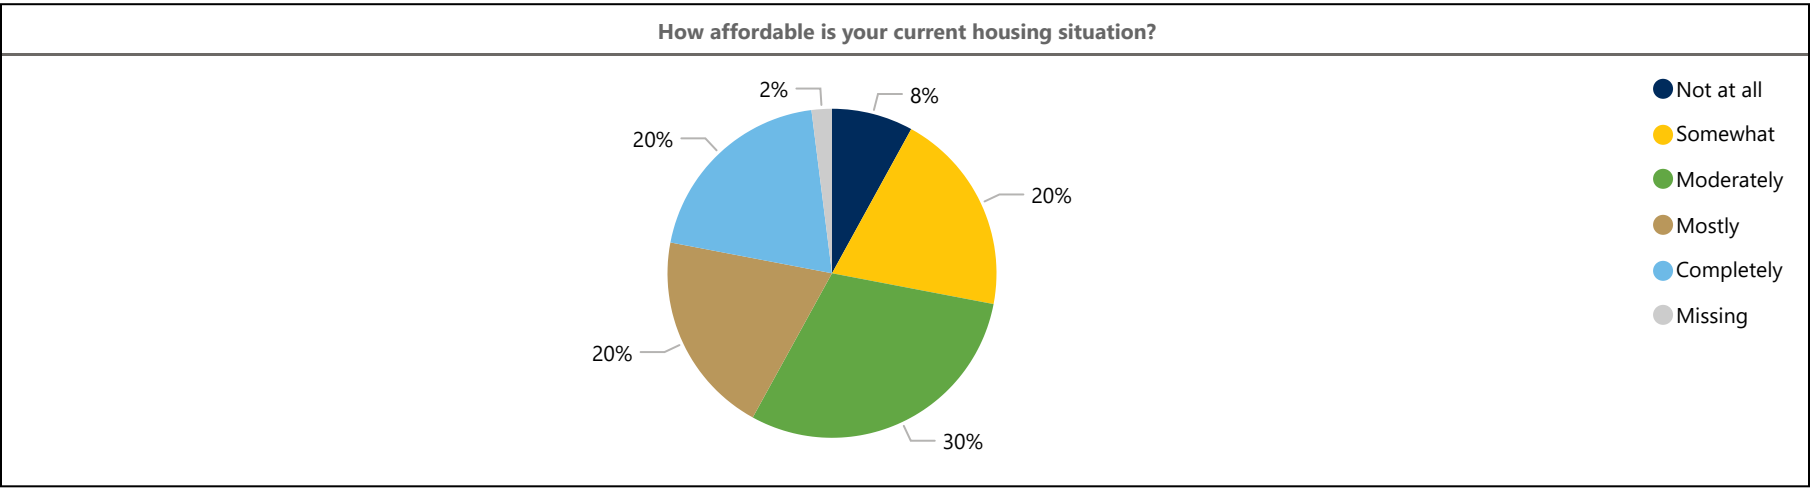

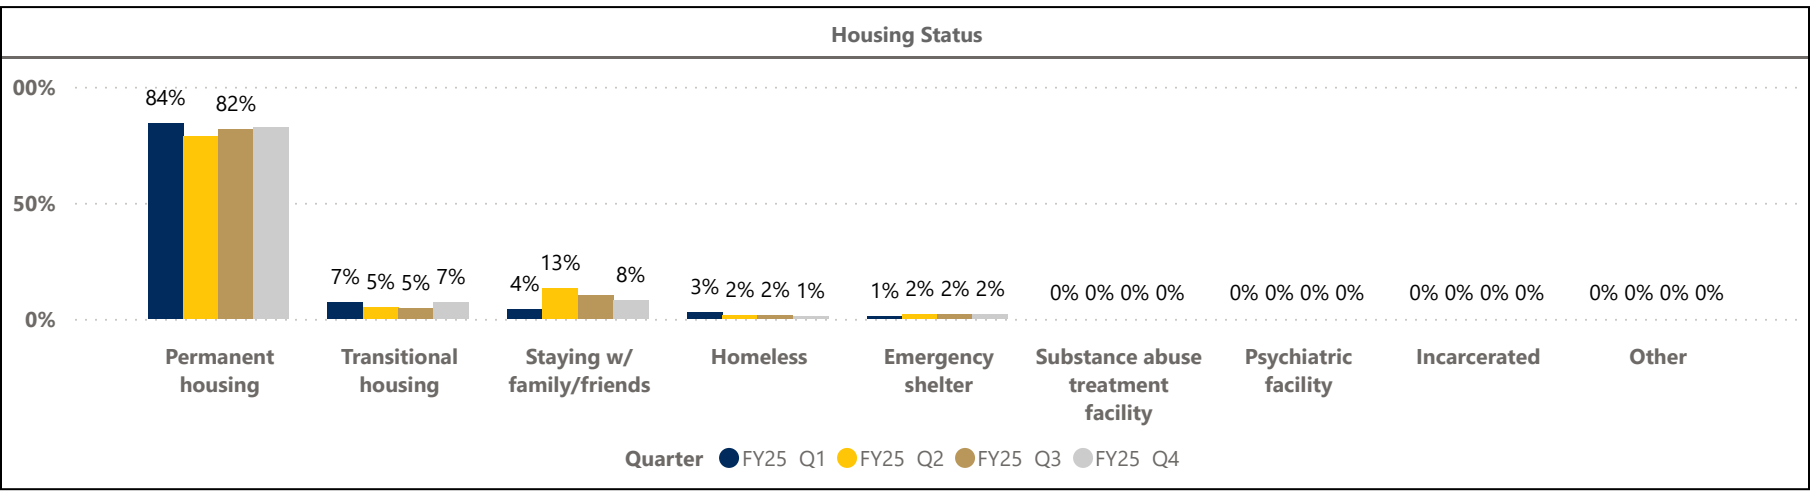

This quarter, 89 % of your Housing clients reported being permanently housed, compared to 11 % of clients who were unhoused or in temporary or unstable housing. This may be partly due to 50 % of clients with submitted QoL Outcomes indicating they are "mostly" or "completely" able to afford their current housing.

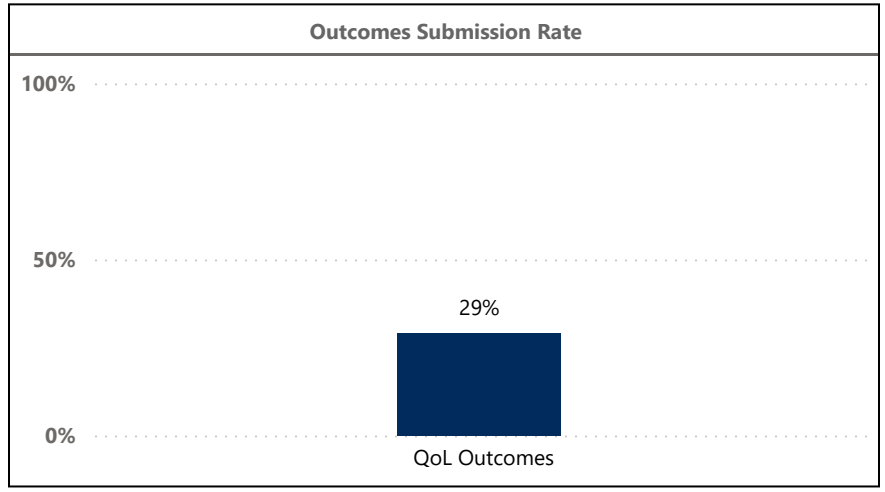

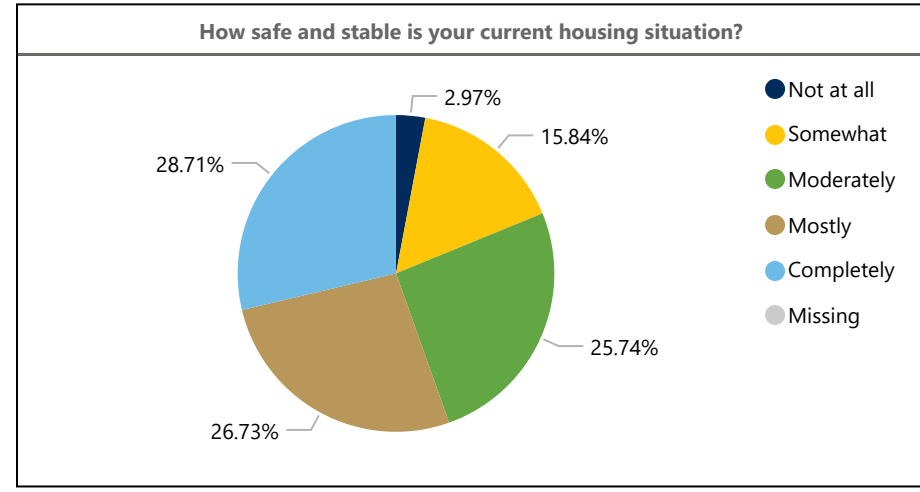

This quarter, 97 % of your clients with submitted QoL Outcomes reported living in safe and stable housing, compared to 3 % clients who did not. Additionally, 41 % of your agency's Housing clients' Outcomes forms were submitted on time. Please note that QoL Outcomes forms must be submitted with annual eligibility recertification.

Quality of Life (QoL) outcomes data were gathered from the e2Boston "Outcome Measure Distribution" report and the "Visual Analytics (Demographics)" report. QoL outcomes are defined as the percentage of Part A clients with outcomes submitted within the measurement period. Each reporting period includes the most recent client data from the previous 12 months. FY 2025 data covers the period from March 1, 2025, through February 28, 2026.

Quality Goal 2 : To increase the viral suppression rate among People Living with HIV/AIDS in the Boston EMA from 90% to 92% by FY 2025.
 Objective 1 : Use the newly updated Quality of Life outcomes data to better understand barriers to viral suppression and identify improvement opportunities and service needs.

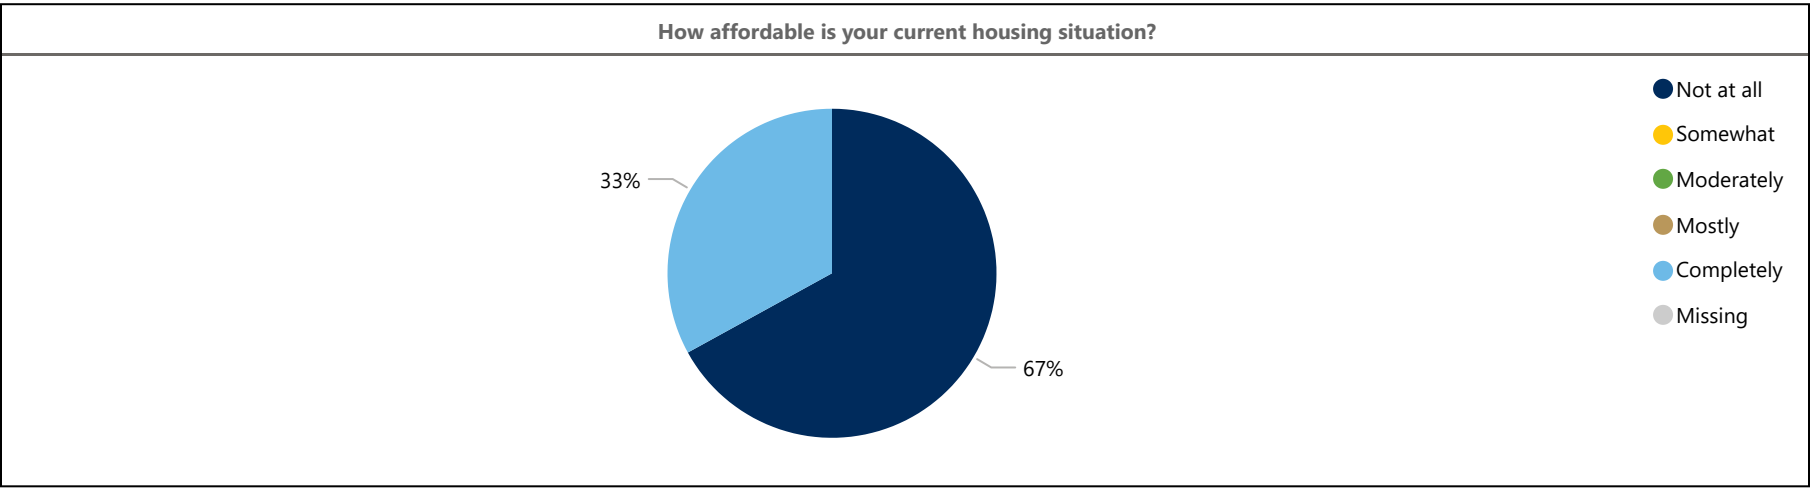

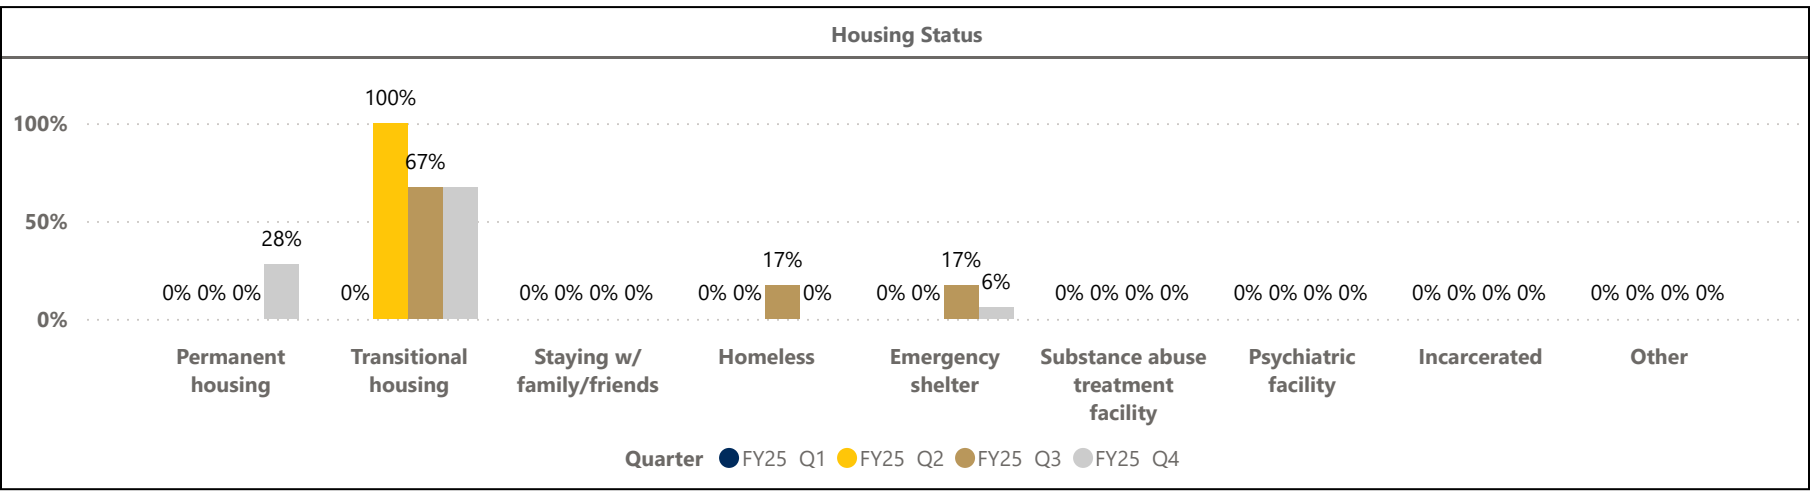

This quarter, 84 % of your Housing clients reported being permanently housed, compared to 16 % of clients who were unhoused or in temporary or unstable housing. This may be partly due to 40 % of clients with submitted QoL Outcomes indicating they are "mostly" or "completely" able to afford their current housing.

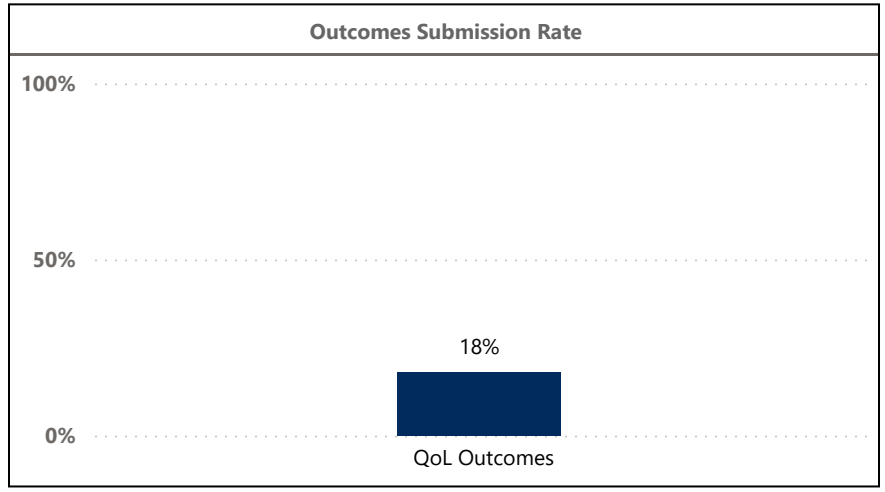

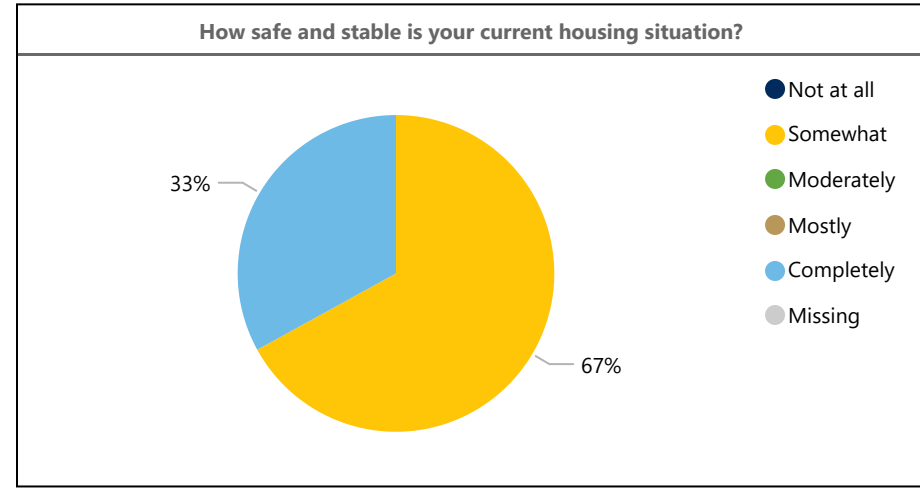

This quarter, 82 % of your clients with submitted QoL Outcomes reported living in safe and stable housing, compared to 18 % clients who did not. Additionally, 29 % of your agency's Housing clients' Outcomes forms were submitted on time. Please note that QoL Outcomes forms must be submitted with annual eligibility recertification.

Quality Goal 2 : To increase the viral suppression rate among People Living with HIV/AIDS in the Boston EMA from 90% to 92% by FY 2025.
 Objective 1 : Use the newly updated Quality of Life outcomes data to better understand barriers to viral suppression and identify improvement opportunities and service needs.

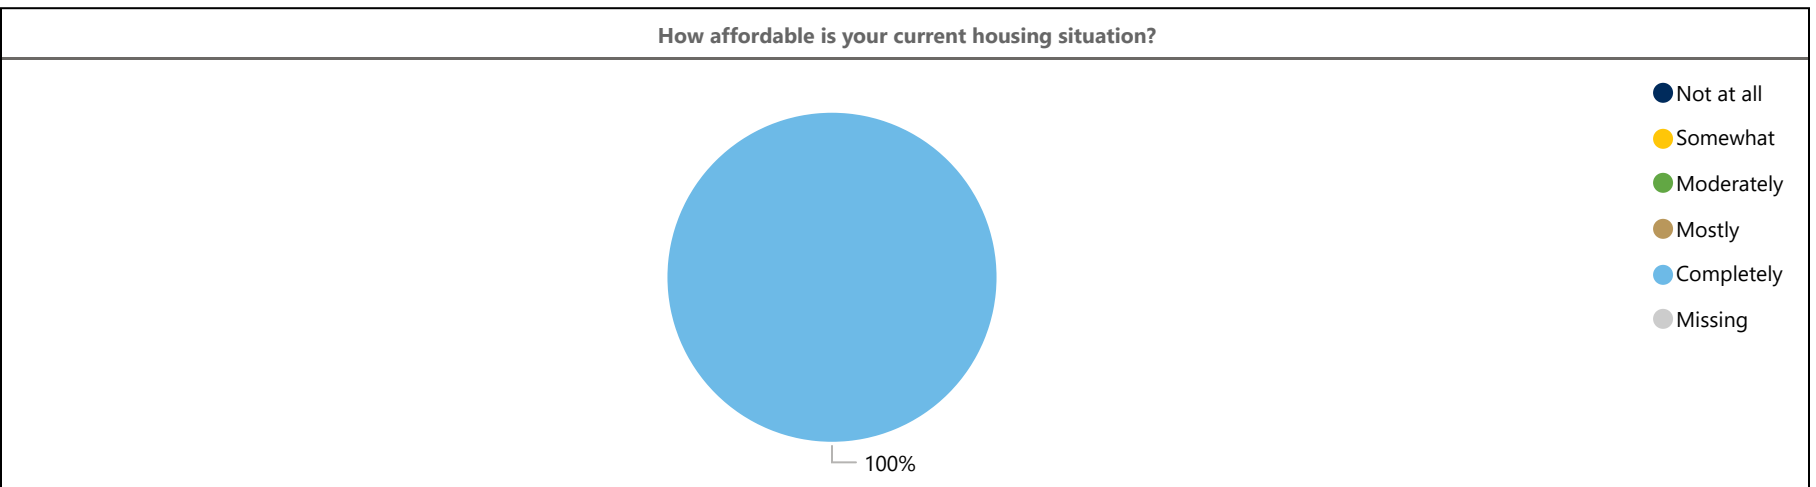

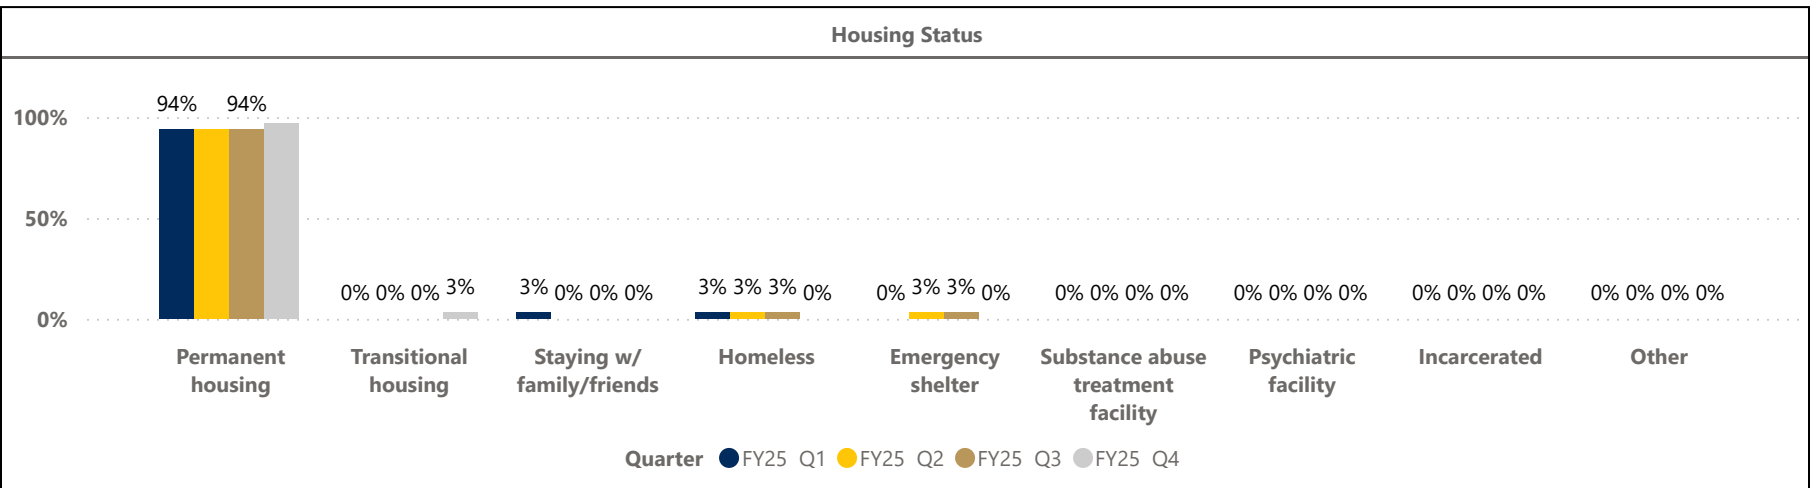

This quarter, 28 % of your Housing clients reported being permanently housed, compared to 72 % of clients who were unhoused or in temporary or unstable housing.
