

BOSTON SAVES LEARNING PATHWAYS

Helping students **learn, dream, and plan for their future.**

Boston Saves offers incentives that help students explore learning, careers, and financial skills. When students complete activities, they can earn money deposited directly into their Boston Saves account to help pay for college or career training after high school.

PLAN: EXPLORE FINANCES INCENTIVE 9TH – 12TH GRADE STUDENTS

Students build financial skills that will help them prepare for life after high school.

HOW IT WORKS

Complete 4 financial literacy modules per academic year, such as:

- Create a simple monthly budget.
- Learn about saving and interest.
- Research the cost of college or training programs.
- Compare student loan and financial aid options.
- Learn about credit scores and credit cards.
- Talk to an adult about managing money.

WHAT STUDENTS EARN

Students earn \$15 each quarter for completing the Explore Finances activities. The incentive will be deposited into the student's Boston Saves account.

HOW TO CLAIM THE INCENTIVE

1. At the beginning of each quarter, eligible students will be sent a link to complete the newest module.
2. Follow the directions in the email and complete the module.
3. At the end of each quarter, \$15 will be deposited into the Boston Saves account of any eligible student who completed the module.

WHY THIS MATTERS

This incentive:

- Helps students understand how to manage money in real life
- Builds confidence in saving, budgeting, and spending decisions
- Prepares students to pay for college or career training
- Encourages smart choices about loans, credit, and financial aid
- Connects everyday money decisions to future goals and opportunities

ABOUT BOSTON SAVES

Boston Saves is a children's savings account program for Boston Public Schools students. Students automatically receive a Boston Saves account and can earn additional incentives by participating in program activities. Learn more at boston.gov/boston-saves.
