S1-GW2,and S1-GW3 for the sum of PCBs

Notes: MCP Method 1 Standards are included for reference purposes only, site specific standards were developing using a Method 3 Risk Assessment

NS - Not sampled. BDL - below detection limit.

e - concentration exceeded calibration range for analyte.

"P" flag is used for pesticide/PCB/herbicide compound when there is a greater than 40% difference for detected concentration between the two GC columns used for Primary and Confirmation analysis. The difference typically indicates an interference, causing one value to be unusually high. The lower of the two values is reported in the Analysis Report.

UCL-Upper Concentration Limit
NA - Not Applicable
"J" indicates an estimated value due to a detection below the reporting limit or an estimated concentration for Tentatively Identified Compound.
"E" indicates that the compound concentration exceeded the Calibration Range.
"D" indicates that the compound concentration was obtained from a diluted analysis.

"J" indicates an estimated value due to a detection below the reporting limit or an estimated concentration for Tentatively Identified Compound.
"E" indicates that the compound concentration exceeded the Calibration Range.
"D" indicates that the compound concentration was obtained from a diluted analysis.

"J" indicates an estimated value due to a detection below the reporting limit or an estimated concentration for Tentatively Identified Compound.
"E" indicates that the compound concentration exceeded the Calibration Range.
"D" indicates that the compound concentration was obtained from a diluted analysis.

"J" indicates an estimated value due to a detection below the reporting limit or an estimated concentration for Tentatively Identified Compound.
"E" indicates that the compound concentration exceeded the Calibration Range.
"D" indicates that the compound concentration was obtained from a diluted analysis.
