### Program 1. Environment

Carl Spector, Manager, Organization 303100

#### **Program Description**

The Environment Program works to enhance the quality of Boston's air, water, and land, and the integrity of its architecture and historic resources. The program researches and writes study reports, prepares National Register nominations, and performs design review of properties subject to landmark, local, district, and National Register review. The Program is focused on implementing the Mayor's commitment to sustainable development, climate protection, and the environment by reviewing environmental impact assessments, issuing permits and providing information and referral services on environmental issues. Through participation in various local, state, and federal review processes, the program seeks to increase the accessibility and quality of Boston's water and riverfronts. The program provides improved access to energy efficiency services for both residents and businesses.

### Environment Department Capital Budget

#### Overview

The City will expand on recent success in retrofitting facilities to reduce energy consumption by launching projects under the Renew Boston Trust program. The Renew Boston Trust program aims to reduce energy consumption at City facilities and achieve annual savings to support the initial investment in energy efficiency projects. The City will continue to address the need for protection against climate change through ongoing planning and implementation of targeted capital investments.

#### **FY20 Major Initiatives**

- Construction will be completed on the first round of self-financing energy efficiency projects in City buildings under the Renew Boston Trust program. The goal of the program is to reduce carbon emissions and achieve energy savings.
- Continuation and expansion of Climate Ready Boston, a city-wide initiative to enhance
  resiliency to future sea-level rise, higher temperatures, and more intense precipitation
  caused by global climate change. Findings will influence design of future capital projects.
- Improve energy management and increase efficiency in City buildings through targeted capital design processes and building assignments.
