

# GIVE YOUR TREE A SECOND LIFE!

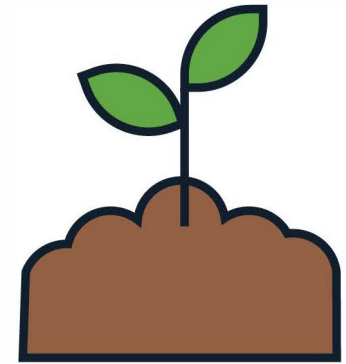

Christmas trees are picked up during the **first two full weeks of January** and shredded for compost. If you have two recycling days, we pick up trees on your first recycling day. The trees should be placed on the **curb by 7 a.m. without ornaments or lights.**

1. Place your tree on the curb during the **first two full weeks of January** to be recycled.

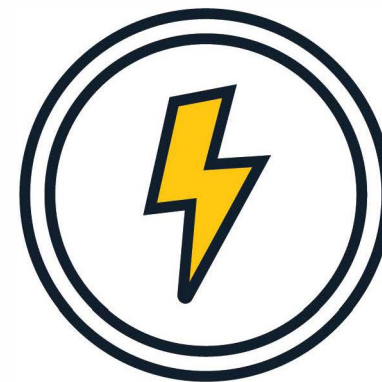

2. The tree gets shredded up to be used as compost.

3. The compost gets distributed in various Boston parks to help new things grow!

4. After the first two full weeks of January, all trees will be collected as trash...

5. ...and then taken to a waste-energy facility as part of a process that generates electricity.
